Lack of Interest in Annual Meeting

Reports of Various Committees Prove Interesting—Principal Hoyle Tells Meeting that More Time is Required for Proper Supervision of Schools.

The annual meetings of ratepayers of the town and Coleman school district were combined last Friday evening. Mayor Burns acting as chairman of both meetings, Thos. Johnson, chairman of the school board, being absent through sickness.

The mayor regretted the absence of ratepayers at the meeting, there being three present, in addition to the councillors and trustees, but the regular business was proceeded with. The financial report was submitted by E. D. Rattrum, of Calgary, official auditor, was read, full particulars of which were given in the published statement in last week's issue of The Journal.

The finance committee's report was submitted by Councillor Pattinson, who explained the details of the money spent in relief for Nick Binda, and also the improvement work on the Red Trail and street maintenance.

The Works and Property committee's report was given by Cr. Nelson, giving details of street improvements, the Fire, Water and Light committee report, in the absence of Cr. J. Moores, was given by Cr. Pattinson, in which he explained at some length the reason of the new street lights not giving the power called for in the specifications, which it was found on investigation to be owing to low voltage on the power line with which the lights were connected. He also referred to the criticism made on the condition of the fire hall and council chamber and office, and stated that an adequate heating plant would be installed before this time next year.

Cr. Rushton reported for License and Police committee, stating he had very little to report; Cr. Fraser for the Relief committee, who outside of the Binda account had spent very little, therefore he could not give very much of an address concerning its activities.

D. Hoyle commended the council for their administration during the year, tendering a vote of thanks for their services.

The financial report of the school district was read by Jas. Ford, and a synopsis of the inspector's report was read by Mr. Snowden. Principal Hoyle addressed the meeting at some length on the work of the staff, paying a tribute to their efficiency, and stressing the need for some provision being made so that more time could be given to supervision, which was somewhat difficult to combine with his own teaching duties. The records showed that Coleman high school pupils were maintaining a very good average in comparison with other schools of similar size in the province, and the staff were ambitious to make an improvement on that for this year.

He stated the Coleman school district will have to meet the problem of supervision which will entail increased expense, and also stated that he had been given loyal support by the trustees. The handling of Grade XII was a big problem, worthy of consideration, for it meant that parents were saved the expense of sending their children to other centres to take this course.

Many other interesting phases of school work were touched on by Mr. Hoyle, and at the close Cr. Pattinson remarked that too little thought was given by the average ratepayer to the problems of the school staff, and proposed a vote of thanks to Mr. Hoyle for his interesting address.

The meeting closed at 10:15, and though lacking in attendance of ratepayers, provided opportunity for those who were there to learn something of the problems confronting the council and the trustees in the carrying on of their duties.

ACTRESS CLIMBS HEIGHTS IN TWENTY-ONE PICTURES

"The Case of Lena Smith" marks Esther Ralston's twenty-first picture for Paramount and it offers her the greatest opportunity of her career for real dramatic portrayal. It is a story of mother-love and her character requires her to appear as a young girl of twenty, as a harassed young mother of twenty-two and as a woman of forty.

Miss Ralston has built up a following for her beauty and her charm and, occasionally has had the chance, as in "The Spotlight," to prove her dramatic ability. In this great picture, directed by Josef Sternberg, which will show at the Palace theatre Friday and Saturday, she surpasses anything she has ever done. It is a role that comes once in a lifetime to a few actresses.

MAYOR BURNS

Who as chairman of the annual meeting of ratepayers and school district stated he regretted that there was a lack of interest shown by absence of public last Friday evening.

Bad Medicine if he is Caught

Some crazy lout whom quite a number of people would take a delight in raising on the toe of their boot has been damaging thermometers by lighting matches under the bulb to burn the glass. Within a week we have been broken on Graham's barber shop, and Constable Houghton is offering a reward of \$10. We wouldn't give ten cents for his safety if he had been caught red-handed at the job.

FORMER COLEMAN DOCTOR IN THE LIMELIGHT

"Unsung hero of war against diphtheria in Northland is Doc Hamman, Fort Vermilion," is the heading in an Edmonton daily telling of his successful effort to secure anti-toxin for his distant post and the brave deed of Captain "Wop" May and his companion in flying from Edmonton with the serum to inoculate the suffering people. Though many already know of the incident, yet there are many in Coleman who also remember Dr. Hamman as a resident here, and the closing paragraph of the thrilling story reads:

"Today, you will find the smiling doctor in the little northern settlement, moving happily amongst his people, always smiling."

"Doc" Hamman has a delightful sense of humor. Didn't he one night when the epidemic was in its incipient stage slip quietly into a dance hall at Fort Vermilion, lock the door, and prick the needle into the arms of every dancer there?

Didn't he tell the school-kids that a prick from his magic needle left a taste in the mouth like maple syrup? Yes the smiling doctor of Fort Vermilion is a happy man."

Mr. and Mrs. J. D. Moir returned on Tuesday to Moose Jaw, after spending six weeks visiting their daughter, Mrs. H. T. Halliwell.

42 Below Zero Was Lowest Temperature

42 Below Zero Was Lowest of Winter at Coleman—Monday Morning Was Coldest of Winter

A week of extraordinary low temperature, dropping to 42 degrees below zero in Coleman, has made people either step around very lively or hug the stove. Some have experienced inconvenience through water pipes becoming frozen, and over a hundred connections have had to be thawed out.

Some reported temperature as low as 60 degrees, but this was imagination, as the most reliable record secured is from the mine office of the International Coal Co., which on Monday morning registered 42 below.

The previous week's lowest record was on Wednesday, Jan. 23, when 42 below was registered, and the minimum throughout the week ranged from 8 degrees above zero on Monday, Jan. 21, to 42 below a week later.

Such intense cold has not been experienced in Western Canada for 20 years, according to meteorological records. It has caused difficulties in the surface work at the mines, as it requires a very heavily increased volume of power to keep the machinery

moving in the tipples, which under ordinary conditions require over 900 h. p. to operate them. Below ground it has been comfortable compared with the temperature above, and one unaccustomed to working below would persevere freely while above it required all one's energy to keep warm.

Possibly the men who suffered most from the cold were those making deliveries of milk, yet in spite of the hardship they never missed a round, which under the extraordinary conditions is a good record; therefore people never suffered from the lack of their daily supply of milk, thanks to the stout-heartedness of the dairy proprietors and their helpers.

In order to be prepared for Wednesday morning's work, machinery in the tipple of the International mine was started up several hours in advance of the usual time to start, in order to have it running easily to handle the coal as it came from the mine.

The trains have been arriving in fairly good time, despite the difficulties of operating, and the latest any train has been in the past two weeks is two hours.

Pythian Lodges

Have Grand Night

Presentations are Made to Installing Officers and Merry Evening is Spent

On Wednesday, Jan. 23, the Pythian Sisters of Coleman, Blairmore and Hillcrest held a banquet in the Castle hall, Coleman, in honour of their Grand Chief Sister Verna Bachus, and G.M.R. & C. Sister R. Muir, both of Red Deer, on their official visit to the Pythian Sisters of the Crow's Nest Pass. The grand chief gave a splendid address on the good of the order, which was very interesting to all present.

On behalf of the sisters of Hillcrest, Blairmore and Coleman, Sister Cora Glendinning of Coleman presented to the grand chief a beautiful tray, and to the G.M.R. & C. a lovely framed picture of the Crow's Nest mountain. After the banquet the rest of the evening was spent in song and dance. The following assisted in making the evening a great success: Mrs. R. Holmes, recitation; Bro. Alf. Phillips, baritone solos; Bro. Ernest Hill, comic song, and everyone present enjoyed dancing to Mrs. Salt's orchestra.

On Thursday evening, Jan. 24, the brothers of Sentinel Lodge No. 25, Knights of Pythias, and the Pythian Sisters of Progressive Temple No. 3, Coleman, held a concert and dance in the Castle hall, in honour of Bro. Tom Lloyd, who left town on Friday night for a holiday in the old country.

Bro. Lloyd became a member of Sentinel Lodge No. 25 when it was first instituted on the first of April 1908, and is a Past Chancellor of the same lodge. He is also a member of Progressive Temple No. 3, Pythian Sisters, Coleman. On behalf of the brothers of Sentinel Lodge and the Sisters of Progressive Temple, Bro. D. Gillespie presented to Bro. Lloyd a pipe and pouch. The following artists assisted in making the night a happy event: Mrs. J. Ramsay, song; Bro. Alf. Phillips, baritone solos; Bro. "Bud" Clarke, song; Wm. Lewis, song; Bro. J. Low, comic solo, and Bob Lloyd, song. The music for the dance was rendered by Mrs. Salt's orchestra, which was enjoyed by all present.

Alberta Hockey Ass'n

Clashes With League

Alberta Hockey Association Issues Instructions to Compete in Play-off for District Championship

Since last week's report was published stating that Hillcrest and Coleman were scheduled for the play-off in B division for the Crow's Nest Pass championship (intermediate hockey) a letter has been received by Coleman and Blairmore clubs from the Alberta Hockey Association stating that Blairmore and Coleman are to play home and home games by February second to decide the championship of the Pass clubs.

This upsets the calculations of the local league officials, as it was considered that Blairmore, as winners of the Crow's Nest schedule, would not require to play off with any of the other teams.

Coleman and Blairmore were scheduled for league games on Monday, Jan. 28 at Coleman, and Thursday, Jan. 31 at Blairmore, while there is still a game to be played between Coleman and Hillcrest.

A meeting of the league will decide what steps will be taken in view of the latest edict of the Alberta association.

ODDFELLOWS WHIST DRIVES AGGREGATE WINNERS

For the series of four whist drives in January held in the Oddfellows hall, the following were the winners of the prizes awarded to those having the highest aggregate scores: Alan Brown, Mrs. Jas. Yates. General prizes, Miss M. White, Robert Evans; Fred Thom, A. Walker.

These whist drives will continue as usual on Saturday evenings, the admission for which will be 50c for whist drive and lunch, including the dance after, and 25c for those attending the dance only. Mason's 3-piece orchestra will furnish the program.

Maurice W. Cooke was a visitor to Corbin on Tuesday, and when seen at the depot was debating in his mind how he would get back from the mining camp—whether to use snowshoes or skis.

Mr. Davey, of the audit staff, C.P.R., spent a few days here last week.

Ste. Petronille

Jack Strathdee, the very able winter sports director at the Chateau Frontenac, his friends will please to learn, is losing weight. Jack runs a summer camp at French River in the fishing season and he took his present job for the reason that he wanted to rest and draw a salary at the same time. When he has time to reflect, and this is seldom, he looks for the easy job of operating a camp and handling a crowd of Indian children. He finds no rest, for during every daylight hour there is something doing on the ski-ill, on the rink, on the slide, and a hundred people to provide with sports equipment and direction. But he keeps fit as they all do. The air is bracing and invigorating and there is lots of fun.

In the group above one sees the director assisting Their Excellencies Lord and Lady Willington who have just come down the slide for the third time. The other group perhaps explains why he finds so much pleasure in his work and why he has taken up skiing again. There is also a picture of his rink which shows how the slide in the background drops down steeply from the citadel.

But take the other picture. This will show you Jack Strathdee's most recent discovery. Beyond the dogs and the terrace is a field of free ice. Beyond that the lake of Orleans is a shadowy form. Now to the left of the island, just above the lamp standard, great albs and chunks of crystal and opaque ice buried themselves in a mass, east reefs of glistening pinnacles to the sky in a glorious chaos and screeching, groaningly settled down. Then the mayor of St. Gregoire and the mayor of Ste. Petronille set out, each armed with a small square cutting. They met somewhere in the centre of the river, solemnly shook hands, and the ice bridge was declared open. It was after that, that the sports director drove over and discovered Ste. Petronille with its ski slopes and toboggan and snowshoe prospects, and also the "Catalogue". The "Catalogue" has a rubble-stone fireplace catalogue about the floor and as window drapes, the oddest old furniture and quaint bed-rooms and, above all a splendid outside. It is less than one hour from Quebec and is hailed as a great discovery.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has been used for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

This Changing World

Annual stock-taking is a wise procedure on the part of every individual and nation; it is absolutely essential in the case of the man in business if he is to make a success of the enterprises in which he is engaged. This is true whether the man be the manager of a large industrial concern, or the owner of a small country store. It also applies to the man who is engaged in the business of farming because to succeed he must know where he made money and where he lost it; he must find the leakages before he can plug up the holes.

Any such stock-taking should include a study of the trend of business throughout the country and the world to the extent that such study is possible. Especially in view of the close commercial relations existing between them, and the fact that they do a larger business with each other than with any other country, the people of Canada and the United States should understand not only what is taking place in their own country, but also in the neighboring country. For these reasons recent analysis of United States business in 1928 as compared with 1927 are of value to Canada.

These comparative studies reveal some startling developments and trends in business. For example, soft coal output decreased 6.1 per cent, and petroleum production 0.9 per cent, while the output of electricity increased 9.2 per cent, thus indicating the rapidly with which electric power is overtaking steam power. Railway carloadings dropped 0.8 per cent, and gross railway income by millions of dollars, but freight movement by motor trucks progressed to a larger mileage, and mail and express movements were heavier, while the output of automobiles increased 24 per cent, thus showing the modern trend to more rapid transportation of commodities.

Department store sales increased 1.1 per cent, mail order sales jumped 14.9 per cent, and chain store sales 17.1 per cent. On the other hand, wholesale trade fell off 1.5 per cent, indicating steady progression in more direct selling from producer to ultimate consumer. Possibly one of the effects of this development is found in the increase of 1.2 per cent in the number of business failures, notwithstanding the year was one of great production, large constructive development and prosperity.

The modern trend in the larger use of electricity, more and more efficient machinery, and more direct and rapid transportation is emphasized by the fact that, in a year of amazing growth in production and construction, employment decreased 3.3 per cent. This is the fact that the modern wage rates were 0.4 per cent higher, indicating that, while there was decreased employment, those in employment were paid slightly higher wages.

The buying power of United States farmers rose 6 per cent, revealing an improvement in the agricultural situation. Business profits rose 11 per cent, savings bank deposits 8.9 per cent, life insurance sales 55 per cent.

The above figures would seem to indicate certain factors and lessons deserving of earnest consideration by all business men. The fact that business profits rose 11 per cent, but business failures increased indicates that the business man who keeps himself informed of, and adjusts his operations in conformity with, changing conditions succeeds while the uninformed and ultra-conservative loses out. To the artisan, clerk and working man the figures seem to say that in this machinery age the man with knowledge and initiative, in a word, the efficient man, is in demand and earns higher wages, while the inefficient finds increasing difficulty in securing work.

The same economic forces are at work in Canada, as in the United States, and the same tendencies are to be noted, the only difference being that this country is not so highly industrialized and has much greater natural resources still in an undeveloped state calling for manual labor. In the commercial world, especially in the retail merchant class, the problem of the mail order house, the chain store, the consolidation of merchandising in the hands of great concerns, and the allied problems of transportation and distribution, are becoming quite as acute, and if he is not to go under the small dealer must meet these changing conditions. He cannot do it alone, single-handed, but his chances of success are good through co-operation.

In the past few years, and particularly in 1928, a great change has taken place on our western Canada farms through the introduction of the combine, the motor truck, and the building of good roads. Through these means production will be increased on the one hand, while less human labor will be required—that is, there is the same tendency in agriculture as in manufacturing industry. This means that, large as western farms are on the average compared with other countries, they will, as operating units, become larger, with all the changes involved. Here, too, the further application of co-operative principles and methods will make for success.

The world will not stand still; it is moving forward at an ever faster pace and he who would stay in the procession, be he merchant, mechanic, farmer or clerk, must be capable and equipped to move with it. The basic foundation of such equipment is as wide a knowledge as possible of the current trend of events, and the accepted methods of coping with the changes and developments so rapidly taking place.

"Blue Blood" Defined

"Blue blood," designating an aristocrat, had its origin in the popular belief that the veins of the high-born carried blood of a purer, deeper blue than those of a plainer people. This misapprehension probably arose from the fact that sheltered, leisure-loving nobles had a fairer skin, through which the blue of the veins was more clearly seen.

A Health Saving Reminder

Don't Wait

until you get the

Influenza

USE

Minard's Liniment

At the first sign of it. Its Healing Qualities are Amazing. THE OLD RELIABLE.

Fertilizers From Trail, B. C.

Further experiments with superphosphate from the smelter at Trail, B. C., will be conducted in 1929 by the Alberta Department of Agriculture in conjunction with the Dominion experimental farms and C.P.R. experimental farms. An abundant quantity of this fertilizer will be available to meet demands.

Long Term Payment

Mrs. Higgins had just paid the last instalment on a perambulator. Shop Assistant—"Thank you, madam. How is the baby getting on now?" Mrs. Higgins—"Oh, 'e's all right. 'E's gettin' married next week?"

Germany's New Street Car

Capable of carrying 117 passengers and of attaining a speed of 50 miles an hour, a new single-deck street car is being tested in Dresden, Germany. It is so long that the conductor has to announce the stopping places by megaphone.

What Farming Is

Not Merely A Business But Building A Home

When a buyer goes hunting a farm his first question often is, "What is the location of the property in relation to schools, churches, highways, markets and shipping points?" Farming is more than a business. Farming is living, building a home, rearing children and educating them.

Here is where community life comes into the picture. When people take an interest in neighborhood affairs; when they help to improve their schools, their churches, their roads, they are improving their own surroundings and adding to the value of their farms.

Life is a very calloused buyer indeed, who would purchase a farm in a district where the community life is dull, and where schools and churches, physically and spiritually, are in a state of bad repair.

NEW HEALTH FOR TIRED-OUT WOMEN

Found in the Rich, Red Blood Dr. Williams' Pink Pills

Anemia comes on gradually, beginning with languor, indigestion to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the palpitating of the heart, headaches, frequent backaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, if neglected, become more serious, but taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. These pills actually make the rich red blood that stimulates and strengthens every organ and nerve in the body. This strength and activity return, the appetite improves and restful sleep is had. What Dr. Williams' Pink Pills can and will do is shown by the case of Miss B. Fanning, Seal Harbor, N.S., who says: "I was in a badly run-down condition, was pale, nervous, and was very poor, and the latest exertion would leave me completely tired. The fact I was unable to do much work about the house. I decided to try Dr. Williams' Pink Pills and after taking a few boxes, I can truthfully say I had gained great health and strength and was able to go about my work with no sign of the former weakness. I cheerfully recommend them to all others who may be in a run-down condition."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Experimental Farm System

Canada Has Largest System Of Its Kind In The World

The Canadian Government Experimental Farm system now embraces 27 farms, seven sub-stations, one horse-breeding station, one fox ranch, 10 plant pathological laboratories and 201 illustration stations at different points in the nine provinces of the Dominion. The system is the largest of its kind in the world.

Mother's Value This Oil—Mothers who know how suddenly grown-up children can grow up, realize their children and how necessary prompt action is in applying relief always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

"You naughty child! Such good soup! I wonder how many children would be glad to get hair that?" "I should, for one, mother."

Use Minard's Liniment for the Flu.

A woman graduate of Glasgow University has become Scotland's first woman minister.

CUTICURA HEALS LARGE PIMPLES

Caused Itching Burning, Also Disfigurement.

"My complexion was completely marred by pimples which varied in size. Some were large, hard and scaly, while others were just red and tender. They caused an itching, burning sensation, also disfigurement."

"After using scores of remedies for over two years, with but little result, I sent for a free sample of Cuticura Soap and Ointment. I was so pleased with the results that I purchased more, and after using two cakes of Cuticura Soap and one large box of Cuticura Ointment I was completely healed." (Signed) W. E. Blackburn, 20 Bellevue Ave., Toronto, Ont.

Use Cuticura to clear your skin. Sample Each Free by Mail. STEP TOWARD STABILITY IN EASTERN EUROPE

Paris.—Poland's acceptance of the Soviet proposal for a protocol putting the Kellogg pact into effect immediately in eastern Europe, will yield beneficial results, it is believed in connection with the general situation in that part of the world.

The Russians have indicated that they are willing to admit not only Poland but also Rumania and the Baltic states to the provisions of this protocol.

Because of the Bessarabian question no diplomatic relations have ever existed between the Soviet and Rumania. It is surmised that the new protocol negotiations will lead to such relations.

The protocol will also go far in quieting Soviet fears of a great aggressive plot against Russia by the capitalist states led by Great Britain.

It is significant that Poland has waited until the United States ratified the Kellogg pact before accepting the Soviet proposal.

Sacrifices Life To Save Companion

Montreal Woman Insists on Firemen Saving Friend

Montreal, Que.—Trapped in a top floor apartment, which she occupied with Miss Harriet Barr, a close friend, Mrs. N. Raipo, widow of C. W. N. Raipo of London, England, sacrificed her life to save that of her companion in a fire which destroyed the Eltona apartment building, a four-story building here. When the firemen forced their way into the Raipo apartment from a ladder, while the fire was sweeping the lower floors, they found Mrs. Raipo near the window and started to carry her to safety, but she insisted that they first save Miss Barr, who was already overcome by smoke. The firemen carried Miss Barr down the ladder and returned to the top floor to find a seething mass of smoke and flames. Their efforts to rescue Mrs. Raipo were in vain and it was not until four hours later that they were able to make their way into the building and carry out her charred body.

France Seeks Payment For German Sugar

Over Three Million Dollars Worth Not Paid For Is Claim

Paris.—A search for more than \$2,000,000, owing the French government, was being made by police after it was revealed that reparations payments of sugar had been turned over to private concerns and not paid for.

Leon Poller, former professor of political economy at the University of Lille, has been arrested as a ringleader in the plot against the government. He is accompanying police on their visits to various concerns believed involved in the deals. Forty thousand tons of sugar were delivered by Germany in lieu of cash as reparations payments. The sugar was turned over to the Sugar Farming company and the Franco-Moroccan Navigation company to sell, but the government has not received payment for it.

King's Condition Improves
London.—Continued improvement in the health of the King today led the court officials to begin planning the regular levees and other functions of the season. The first levee at which the Prince of Wales will preside, will be held at St. James palace on Feb. 25. The King's physicians have made it known that he must spend no more winters in England, and that he must seek a warmer climate for several months each year.

Booher Found Guilty
Edmonton.—Vernon Booher will hang on April 24, 1929. After a deliberation of five hours and eight minutes, the jury found the accused youth guilty of the murder of his mother, brother and their two hired men on July 9, 1928, at Manville, Mr. Justice Walsh immediately sentenced the advocate to be hanged.

Will Advocate Railway Link
Winnipeg.—J. T. Thoren, member of parliament for South-Central Winnipeg, will bring up in the House of Commons at the forthcoming session the subject of more direct railway communication for Winnipeg with Hudson bay.

W. N. U. 1770

Will Urge Negotiation Of Trade Agreement

Chinese Nationalist League Would Develop Business With Canada
Vancouver.—Development of trade between China and Canada through the negotiation of a treaty between their government and that of Canada is a major recommendation to be voiced at the annual convention of Kuomintang, Chinese national government, at Nanking, by the seven delegates from Canada. Seventy-five representatives of all branches of the Chinese Nationalist League in Canada are now holding their annual convocation at Canadian headquarters, Gore avenue and Pender street, and will elect their representatives before the sessions end Jan. 31.

An increase in the number of consuls throughout the Dominion will also be sought by the delegates from Canada. Consulates are at present maintained only at Ottawa and Vancouver.

There are 75 branches of the league in Canada, with three divisions, governing the east, middle west and west. There is a Canadian membership of more than 10,000.

Prizes For Research

Two Will Be Given for Best Work in Cancer Investigation

London.—The grand council of the British Empire cancer campaign announced approval of an offer of two prizes of \$2,500 each, in 1931 and 1932, for the best original piece of work in the investigation of cancer carried out in the British Empire. They will be known as the Garton prizes.

The report of the Medical Research Council, summarizing the work of various research centers in 1927, claims malignant growths in the early stages of cancer can be removed by the radium treatment as efficacious as any surgical means.

New Railway Station

C. N. R. Station At The Pas Is Officially Opened

The Pas.—Another chapter in the development of northern Manitoba was written today when the Canadian National Railway's new \$75,000 station was officially opened here.

A ceremony was held at the new station, which is situated in the heart of the town. Maj. J. G. MacLachlan, district engineer of the C. N. R., turned the station key over to V. I. Smart, general superintendent of transportation, who opened the door of the station to the public.

Believes Soviet Rule Over

Montreal.—The Soviet experiment in Russia had failed tragically and its endurance was now but a question of the patience of the Russian people, according to his imperial highness the Grand Duke Alexander Michailovitch, brother-in-law of the late czar, cousin by marriage to King George, who has arrived here. The grand duke was certain that his countrymen would not suffer the yoke of the communists very much longer.

New Senator Appointed

Ottawa.—Hance J. Logan, former Liberal member for Cumberland, N. S., in the House of Commons, has been appointed to the Senate, filling the vacancy in that body caused by the death of Senator W. B. Ross. Announcement of the appointment was made at the prime minister's office.

Will Take King To Sussex

London.—Preparations are going forward for the removal of King George to Bognor in Sussex as soon as his doctors decide that the time is opportune. The King will travel the 65 miles to the coast resort in a large car fitted so that he can lie as comfortably as in his bed at Buckingham palace.

Canada's Record Wheat Yield

Ottawa.—Canada's yield of wheat for the year 1928 amounted to 533,571,700 bushels. This is the highest on record and the first time that Canada has harvested a crop of over half a billion bushels. This announcement was made in the crop report just issued by the Dominion bureau of statistics.

Is Acting Postmaster

Ottawa.—William H. Pennock, for several years assistant postmaster at Ottawa, has been named acting postmaster. The vacancy was created by the death recently of Andrew G. Acres.

Class B Fairs

New Dates Are Set At Meeting Held In Winnipeg

Winnipeg.—The establishment of an eastern and a western circuit of B class fairs, and the setting of dates for fairs in each circuit, was the principal result of a session of the Western Canadian Fairs association held at the Fort Garry hotel.

The Western Canada Association of Exhibitions, which comprises the class A fairs concluded their convocation in the afternoon.

Archie Wilson of Saskatoon, heads the Western Canada Association of Exhibitions for the coming year, being elected president to succeed H. W. Abbott of Edmonton at the closing session. H. G. Smith, Regina, was re-elected vice president of the organization and S. W. Jones, Saskatoon, will continue in office as secretary-treasurer.

Johnny J. Jones was awarded the contract for midway shows at class A fairs.

Because the circuit of the Western Canada Fairs Association had become so unwieldy by reason of the large number of fairs, it was divided into two circuits, and the dates for fairs set as follows:

Eastern circuit—Carman, June 28 to July 1; Estevan, July 3 to 6; Portage la Prairie, July 8 to 10; Dauphin, July 11 to 13; Prince Albert, July 15 to 17; Melfort, July 18 to 20; Yorkton, July 22 to 24.

Western circuit—Weyburn, July 8 to 10; Assiniboia, July 11 to 13; Lethbridge, July 15 to 17; Red Deer, July 22 to 24; Camrose, July 25 to 27; Vegreville, July 29 to 31; Vermilion, Aug. 1 to 3; Lloydminster, Aug. 5 to 7; North Battleford, Aug. 8 to 10.

EMBARGO BRINGS PROTEST FROM RAILWAY HEADS

Montreal.—The partial embargo placed against central European colonists by the Dominion department of immigration and colonization drew from the Canadian Pacific and Canadian National railways today a formal protest.

The decision, it was claimed in a statement issued by the presidents of the companies, will not only work lasting hardship on both transportation systems but will destroy the faith the governments, whose people are affected, have in Canada.

The companies deny they are interested in moving colonists from non-preferred countries in Europe rather than those from Great Britain or other northern European or preferred countries.

The attitude of the transportation companies was outlined in a statement issued to The Canadian Press by the railway presidents, E. W. Beatty and Sir Henry Thornton.

RECEIVES IMPORTANT POST

Dr. Charles R. Best, collaborator with Dr. P. C. Banting in the discovery of insulin, has been appointed to the chair of physiology of the University of Toronto. He succeeds Prof. J. J. R. MacLeod, who left Toronto to return to the University of Aberdeen.

Exhibition May Be Re-Established

Winnipeg Ratepayers Will Vote On Question In March

Winnipeg.—An exhibition which the promoters hope will take a prominent place among the exhibitions of the Dominion is being planned at Winnipeg, according to Wesley McCurdy, director, speaking to western exhibition authorities meeting here yesterday.

Winnipeg ratepayers will vote March 15 upon the question of whether or not they wish to authorize expenditure of \$550,000 for the re-establishment of the city's exhibition.

Decline In Dairy Production

Winnipeg.—High spring feed prices and tempting offers by American buyers for dairy cows caused a falling off in total dairy production for 1928 in Manitoba, according to Alex. McKay, president of the latter manufacturer's section of the Manitoba Dairy association. The year, on the whole, was successful, the president intimated in his address.

To Tour Europe

Ottawa.—Arrangements have been concluded here for the European tour of a large party of Canadian club members. The group which it is expected will draw members from every part of the Dominion, is to sail from Montreal aboard the liner Laurentic June 8.

Wrote For "Punch"

London.—Rudolph Chambers Ledermann is dead at Bourne End after a long illness. He was famous as an oarsman and rowing coach and also for the light, witty verses which he contributed to "Punch."

BACK FROM THE BARRENS

Although he had not been out of the Barren lands for fifteen years, George Yandle, trapper, maintained a fine sense of civilization. The first thing he did when he got to The Pas—he did not even wait until he reached Winnipeg—was buy himself a pair of spats with zippers. Yandle acted as interpreter when Count In Tolstoy entertained the Eskimos in the far north. The photographs which was taken outside the Canadian National Railway station in Winnipeg, just after the trio's arrival, shows Yandle; Tolstoy, in the center; and W. J. Casel, photographer. Count Tolstoy, who is the grandson of the great Russian writer and philanthropist, headed an expedition into the Barrens to study the migration habits of the caribou, and some unusual photographs were obtained of the immense herds. After spending a day in Winnipeg, the party, together with five Eskimo dogs, worth \$65 apiece, went to Timagami, the Ontario forest reserve, for further study of wild animals, and thence to New York.

Needs Britain's Protection

Iraq Is Not Sufficiently Prepared to Defend Itself

London.—Differences between the British and Iraq governments over the ability or otherwise of Iraq to defend itself have resulted in the resignation of the Iraq cabinet under Premier Aska Jafar Pasha of Asker.

The British authorities hold the view that Iraq, placed under Britain's protection after the war, is not yet ready to assume full responsibility for its defense.

A treaty between the British and Iraq governments in 1922 provides the responsibilities of Great Britain as a mandatory power shall be terminated when Iraq is admitted to the League of Nations.

Iraq has a population of nearly 3,000,000, practically all Mohammedans. Its chief city is Baghdad, and the territory is east of Arabia, comprising 150,000 square miles.

The real difficulty it is pointed out in London is that even the existing agreements between Great Britain and Iraq are not fulfilled particularly with regard to military and financial matters, including railways and forts.

South African Tourists Greeted By Snowstorm

Students Wanted Thrill and Got It In Toronto

Toronto.—In the midst of a blinding snowstorm 37 students of South African universities arrived here for the course of their tour of United States and Canada.

"Just what we wanted," one of them exclaimed heartily, though citizens of Toronto were finding the storm troublesome.

"We were counting on Canada for the thrill of real cold weather. Lots of snow and the novelty of ice hockey," T. Thorpe, Capetown university spokesman for the visitors said.

The students were the guests of Toronto university and left for Montreal for a visit to McGill university. Before completion of the tour the students will have been away from home for three months and will have travelled 25,000 miles.

Crosses Atlantic In Steamer's Lifeboat

Stowaway From England Had Feet Frost-Bitten During Voyage

New York.—Matthew Baderley, youthful cheese cart driver of Cheshire county, England, completed a stormy crossing of the Atlantic in a lifeboat, as uncomfortable but not a dangerous journey, for the lifeboat all the time was hanging in its davits on the liner Lancastrian. For 10 days the stowaway stuck it out through storm and cold, living on the emergency rations in his hiding place. He kept his hands warm against his body, but his feet were frost-bitten and just before the ship reached quarantine the pain drove him forth.

He collapsed while telling his story but was revived and put to bed in the ship's hospital. He will be sent back to his cheese cart.

The relations between the United States and Great Britain grow increasingly unhappy," he says. "A spirit is growing in the two countries which is estranging them and is encouraging a kind of squabbling criticism which destroys mutual understanding and forbearance."

"Have both of us failed to observe how easy it is to slip into war if nothing, how ready popular imagination is to be set on fire by any one—even an almost anonymous newspaper proprietor—who cares to light a match?" he asks, then continues:

"This is no case for private and unofficial action and conferences. The governments must act. Both countries ought to appoint five or six outstanding men to discuss our differences. Mayhap fresh air would clear our minds of them."

URGES BETTER FEELING BETWEEN TWO NATIONS

New York.—J. Ramsay MacDonald, former premier of Great Britain, in an article under his name in the current issue of The Nation, Liberal weekly, makes a plea for the understanding public men of the two nations "to meet and drag from the obscure corner of sulky suspicion the things that make difficulties between us."

The relations between the United States and Great Britain grow increasingly unhappy," he says. "A spirit is growing in the two countries which is estranging them and is encouraging a kind of squabbling criticism which destroys mutual understanding and forbearance."

"Have both of us failed to observe how easy it is to slip into war if nothing, how ready popular imagination is to be set on fire by any one—even an almost anonymous newspaper proprietor—who cares to light a match?" he asks, then continues:

"This is no case for private and unofficial action and conferences. The governments must act. Both countries ought to appoint five or six outstanding men to discuss our differences. Mayhap fresh air would clear our minds of them."

CANADA'S CLAIM APPROVED BY RADIO MEETING

Ottawa.—Canada's claim to 40 per cent. of the intermediate waves has, it is understood, been successfully maintained at the international radio conference meeting here.

While the proceedings continued to be closely guarded, the scheme of division is believed to be approximately 40 per cent. to Canada and 60 per cent. to the United States. Newfoundland, Cuba and Mexico will share certain of the channels.

From the fact that most of the waves have a range of only 1,000 to 1,500 miles, Newfoundland can share a number of waves with stations in the southern United States and no conflict will occur. In the same fashion Cuba and Mexico will occupy certain channels in common with Canadian transmitters.

Although the percentages eventually chosen were probably always in view, it is known that the United States was seeking a much larger share.

There are 639 channels in the band with approximately 250 channels available for distribution after allowing for amateurs and dot-and-dash stations.

Ratifies Kellogg Treaty

Action of Lithuania May Affect Dispute Between Russia and Poland

Kovno, Lithuania.—The Lithuanian government ratified the anti-war Kellogg pact.

Ratification of the Kellogg pact by Lithuania has significance in its bearing upon negotiations between Russia and Poland for a special protocol applying the pact in a localized sense to the states that touch the western frontier of Russia. Poland and Lithuania have been at odds over frontier questions and over the ownership of Vilna, a city which Lithuania claims as its legitimate capital but which is now held by Poland.

Plan Air Endurance Test

Flight to Prove Claim Made for New British Plane

London.—The Mail says that a non-stop flight from Capetown to England is planned to test the claim made for a new British aeroplane that it is capable of flying further without refueling than any other in the world.

In the plane, which has tanks for three and one-half tons of gasoline in its hollow 35-foot wing, is now being put through trial flights. Two pilots will fly it to Capetown by easy stages and attempt the return flight without a stop.

Inspect's Seagrave's Car

Prince of Wales Learns Things About Speed Riding

London.—The Prince of Wales, driving alone in his automobile, made one of his typical impromptu visits to a London motor house to inspect the car "Golden Arrow" and the speedboat "Miss England," with which Maj. H. O. Seagrave intends to attack world's speed records this year.

The major happened to be present and he showed his vehicle to the prince, answering many questions about the sensations of speed riding.

Treating Drug Addicts

Geneva.—Nostake Sato, the Japanese League of Nations representative, has informed the international opium committee that Japan was successfully applying medical treatment to Korean morphine addicts. Out of 654 cases, 660 had been sent to hospitals and cured.

Director of Cattle Association

Brantford, Ont.—R. B. Pait, for 25 years editor of the Farm Journal, has been appointed director of extension of the Holstein Friesian association of Canada. His headquarters will be in Brantford.

Wireless For Planes

Toronto.—Provincial air force planes will be equipped this year with wireless, so they may send reports to headquarters from any distance up to 400 miles it has been announced.

Report Severs Relations

Berlin.—An entirely unconfirmed report circulated in Berlin said Japan had severed diplomatic relations with Russia. The source of the report was not known.

NOTES AND COMMENTS

The fond hope that we might escape the rigors of a severe winter were rudely shattered during the past two weeks. Prior to that time with the exception of a very cold spell early in December, mild weather had been experienced. But two weeks ago the mercury began to drop, and when it reached from 30 to 35 below zero, most people considered that was the limit. But just to show that these western provinces are still subject to Arctic blasts, Monday morning capped all records this winter with 42 below zero. After such an experience as that, just zero weather is mild in comparison.

Such a blast of cold weather will put the soft pedal on our boasts of mild winters and butterflies floating around in December and January. We will touch wood if we begin to tell somebody that it does not get really cold in this section of Alberta. Even British Columbia was included in the icy blasts, for a week's reading of the temperatures at Fernie last week showed it was more often 30 below zero than it was above.

There is always a silver lining to any cloud, and the result of two weeks of Arctic weather will mean stimulated demand for steam coal from the Crows Nest Pass. We may not like the weather, but it is that kind of weather which increases business for everybody here. Which means that you cannot have pleasures without pain.

Not only in the realms of business but also in the field of sport the cold weather makes itself felt, and the schedule of the hockey league in the Pass has been temporarily abandoned, because there would be hardly any gate fees to enrich the club treasuries if games were played in 40 below zero weather, to say nothing of the hardship on the players. But by the time this appears in print it is probable that arrangements will have been made to complete the series originally planned.

Banff Winter Carnival committee will be hoping that warmer weather will have arrived by Saturday, the opening day, for though everybody likes sharp weather, the past two weeks makes everyone wish for a rapid rise in the temperature, especially the man around the house who has to arise several times during the night and spend his waking moments in carrying out the ashes.

If any old-timer arises to say that he has seen colder weather than this, all we can say is that he is doubly welcome to the experience.

Occasionally one hears a pessimist remark that there is no future for coal, and he goes on to tell of oil, water power, gas and what not taking the place of fuel. A noted scientist recently stated that fuel will always be one of the basic necessities for industry, and as Nature never provides anything which is not destined to serve man's needs, the view of the scientist might well be concurred in. As the world's population increases, so its needs in all lines increase, and the utilization of forces formerly unheeded is made through necessity. There may be over-production in the coal industry owing to there being such a plentiful supply available in various countries of the world, but what the conditions will be fifty or a hundred years hence the present day generation cannot tell. But one would be safe in venturing the opinion that there will not have been found sufficient substitutes to take the place of coal in all lines of industry and transportation. It may be used in different forms, as is already the case, but processes may be developed which will increase coal's uses instead of diminish them. So do not become unduly alarmed over the future of the coal industry in the Crows Nest Pass, with its vast sources of potential wealth.

Town councillors and school trustees give considerable time throughout the year to the carrying on of the ratepayers' business in the administration of town and school affairs, yet how many ratepayers will give an hour or two towards co-operating with them by attending the annual meeting of ratepayers to hear their reports for the year? The answer given last Friday night denotes that Coleman citizens take the prize for apathy in the conduct of municipal affairs, for besides the councillors and two school trustees, two ratepayers were present, they being the school principal and the editor of The Journal, and Constable Houghton. Just think over it! Is it not a fine tribute of appreciation and encouragement for men to act on a council or school board? We think not! Further comment is needless.

The minister from his pulpit every Sunday endeavors to interest his congregation in the word of God and our spiritual welfare. The editor tries to interest his audience of readers with something of interest of local worldly affairs. Both search their minds for something that will make an appeal to the better side of human nature, and to keep alive the spirit of optimism and hope that helps to make life brighter. The editor may have to do it in somewhat of a hurry at times, as he has other problems to overcome in the production of a newspaper each week besides writing an editorial column. But it must always be remembered that a newspaper is after all a reflex of community life, recording and commenting on its manifold activities. It is largely a community institution, as is the church, and if at times there is a dearth of things to make interesting comment on, just remember that it is somewhat difficult to make bricks without the material to make them. If you have something of interest, just pass it along.

Town of Coleman Financial Statement

FOR THE YEAR ENDING DECEMBER 31, 1928

The Mayor and Councillors,
The Corporation of The Town of Coleman,
Coleman, Alberta.CALGARY, ALBERTA,
11th January, 1929.

Gentlemen:—

In accordance with your instructions I have audited the books and accounts of the Town of Coleman for the year ended 31st December, 1928, and beg to report that I have received all the information and explanations required.

I have prepared the attached Statements for your information in addition to completing the regular Auditor's Financial Statement issued by the Provincial Government Department of Municipal Affairs:

1. Cash Statement for year 1928.
2. Revenue Statement for year 1928.
3. Statement of Local Improvement Notes Payable.
4. Balance Sheet as at 31st December 1928.

The Cash Statement records the details of the actual cash received and paid out during the year, and this Statement shows that the actual Cash Received was \$243.80, more than the actual cash paid out.

The Revenue Statement shows a Surplus for the year's work after making the usual annual Depreciation Allowances on all the Town Property Assets. This year an allowance of 5% has been included for account of Town Hall Building and 20% for the Red Trail work.

You are aware that the money spent on the Red Trail was more than the Government were requiring in order that the Grant offered by the Public Highways Branch might be secured. This extra cost to the Town was met by proceeds of Local Improvement Notes Sold which Notes will mature during the ensuing five years. Therefore the Depreciation Reserve has been based on a five year basis, viz., 20% each year.

The N. Binda Relief account has again been a heavy item of expense, and the security in the hands of the Town and referred to in my report dated 16th January 1928 having proved valueless the account has been charged to current expense during 1928, and the 1927 account has been written off to the Surplus Account. The N. Orlando has no visible assets. Although these accounts have been thus removed from the list of the Town Assets, it does not prevent the Town Officials taking action to recover these amounts at any time within the next few years should the opportunity arise.

In accordance with your instructions the Water Supply Account has also been charged to Surplus account. This is the account that has been carried as an Asset for many years past although the work is now valueless.

The Local Improvement Notes maturing in 1928, together with the note that matured in 1927 but was not paid, have been paid in full.

In accordance with the provisions of the Town Act 1927 I have visited the Town of Coleman office four times during the past year, and at all times was the work up to date, the cash properly deposited with the Canadian Bank of Commerce and the several books in balance.

Pending further instructions from the Board of Public Utilities, the accounts of Mr. C. J. Ford and Mr. H. Madden are still outstanding in connection with the Light and Water business of 1927.

E. D. BATTRUM, Auditor.

Noted Singers Coming

Westminster Glee Singers to Appear Here Under Auspices of St. Alban's Church

The announcement that the world-famous English company, the Westminster Glee Singers, will pay a visit to Coleman will be very welcome to all who have heard of the triumphant success of these celebrated vocalists throughout the Dominion. The question is sometimes asked how it is possible for so large an organization to visit the smaller towns of Canada, and Mr. Edward Branscombe, the director and organizer, supplies a very interesting answer. He says it has been one of the outstanding features of the present tour how wonderfully the public have responded to the charm of the beautiful old British music, which is the specialty of the Westminster Glee Singers. Audiences have gathered together in the smaller places in a most remarkable manner, quite superior to anything which has been achieved in any other part of the British Empire, and many townships in Canada have been visited which would be out of the question elsewhere. In many places of less than 200 inhabitants record houses have been the rule, and in some cases the record houses have been arranged to take place a few days later than the original performances. Mr. Branscombe thinks this is mostly due to the fact that so few "road shows" are now in existence, the advent of the moving pictures having created an entirely different condition of affairs to what existed 25 years ago. Since the commencement of the tour these English vocalists have given upwards of 200 concerts, and are now performing right through to the Pacific coast, prior to their tour of Australia and New Zealand. They will be heard at the Opera House on Tuesday, April 9th.

Here and There

(219) Boys at Red Deer, Alberta, earned Christmas pocket money by trapping. They brought in nearly 400 weasel skins in less than a fortnight and also coon, rabbit, squirrel and cat skins.

Further experiments with super-phosphate from the smelter at Trail, B.C., will be conducted in 1929 by the Alberta Department of Agriculture in conjunction with the Dominion Experimental Farms and C. P. R. experimental farms. An abundant quantity of this fertilizer will be available to meet demands.

Upwards of four millions of dollars will be expended this season in effecting alterations, improvements, and extensions to the Palliser Hotel at Calgary, Alberta, and the Empress Hotel at Victoria, British Columbia. E. W. Beatty, chairman and president of the Canadian Pacific Railway has just announced. Four additional floors will be added to the former and an entirely new wing will be extended from the latter, bringing these two famous hosteleries even more up to date.

A Negro preacher walked into the office of a Southern newspaper and said: "Misto Edito, they is forty-three of my congregation which subscribe to yo' paper. Do that entitle me to have a chinch notice in yo' Salday issue?" "Sit down and write," said the editor. "I thank you." And this is the notice the minister wrote: "Mount Memorial Baptist Church, the Rev. John Walker, pastor. Preaching morning and evening. In the promulgation of the gospel, three books are necessary: The Bible, the hymn book, and the pocketbook. Come to-morrow and bring all three."

Twenty head of Holstein cattle from Alberta pure bred herds have arrived at Vancouver over Canadian Pacific Railway line for shipment to Japan. These cattle were collected for a Japanese buyer by deputy minister of agriculture Craig. Quite a few such shipments have passed through this port recently. The purchase of the stock for Japan was made through the Alberta government and the cattle were selected from various herds in the province. Several of the animals or their immediate ancestors have records of 20,000 pounds of milk per year and all of them are from high producing dams.

A monster black bear weighing over 400 pounds that stalked upright through the woods seeking what or whom it might devour and which had no forepaws, has just been trapped in New Brunswick, according to Dave Ogilvie, well-known guide and outfitter. The beast used to rifle all the garbage dumps and refuse heaps in the neighbourhood of Plaster Rock, on the line of the C. P. R., and was caught by means of a trap hidden under dead leaves and some old paint tins. Examination of the body showed that its forefeet were crippled, either by deformity at birth or by an accident, and that it must have walked about on its hind feet. Only tracks of the beast had been found, and considerable mystery existed as to the murderer. Seymour Traflet and Jack Ogilvie caught the bear, whose skin measured over seven feet in length.

WORLD HAPPENINGS BRIEFLY TOLD

The Turkish assembly ratified the pact for remuneration of war and the government instructed its ambassador at Washington to sign the pact.

The Rev. Dr. S. Parkes Cadman, pastor of Central Congregational church, Brooklyn, says he has been invited to deliver the sermon at the opening of the League of Nations conference at Geneva on Aug. 28.

Premier Stanley Baldwin announced in the House of Commons examination will be held into the 60-year-old project for a tunnel under the English Channel.

Several persons were killed and a thousand buildings destroyed in the populous Greek district of Tavak in Constantinople by a terrific fire whipped by a fierce wind which laid waste an extensive area.

Japan has notified the League of Nations that manufacture and distribution of narcotics in Korea had been taken out of the hands of private companies and made a government monopoly.

Every effort will be made to secure for Canada the winter sports of the Olympic games in 1932. It was decided at a meeting in Toronto of the executive committee of the Canadian Olympic committee.

The victory scholarship of the Royal Institute of British Architects has been won by a woman for the first time. Miss Betty Scott of Kensington, England, 22 years old defeated 20 other competitors, most of whom were men.

McGill university library has come into possession of two extremely valuable Greek manuscripts. The larger of the two dates back to the 12th or early 13th century, while the other volume is a section of a text from the 13th century.

Col. Robert Johnson is home with his mother and sister in Chicago after having wandered over the country, a victim of shell shock and loss of memory since the World War. Johnson's kin had given him up for dead.

Edmonton Telephone System
As showing the growth of business in Edmonton, "The Journal" points out that whereas 24 years ago some 660 citizens of the then town of Edmonton voted \$27,000 for the purchase of the Edmonton district telephone system, (for the use of 288 subscribers), the system has now grown to represent a capital investment of \$250,000, with subscribers numbering 15,000.

Vancouver Grain Exports
Grain exports from Vancouver for the calendar (1928) year will exceed 90,000,000 bushels, according to Merchants' Exchange figures.

The average depth of the ocean below sea level is 12,600 feet.

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brouseau, Magog, Que., writes:—"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co. Ltd., Toronto, Ont.

Time For Expansion In Sheep Industry

Can Be Greatly Developed in Canada Says Expert

In a review of the sheep industry, A. A. MacMillan, chief of the sheep division of the Dominion Livestock branch, says the time seems opportune to gradually expand the industry in keeping with consumptive demand, provided "the marketing of lambs can be organized on the basis of regulated marketing extending over a longer period."

The sheep industry can be developed and the possibilities are unlimited from the range standpoint in the prairies, the foothills and the interior of British Columbia, while in eastern Canada many thousands of farms are not carrying one per cent. of the number they should carry, the report states.

CHILDHOOD AILMENTS

Can Be Quickly Banished With Baby's Own Tablets.

The ailments of childhood are many but nine-tenths of them are due to one cause and one cause only—a disordered condition of the stomach and bowels. To quickly banish any of the minor ailments of babyhood and childhood the bowels must be made to work regular and the stomach must be sweetened.

No other medicine for little ones has had such success as has Baby's Own Tablets. They banish constipation and indigestion; break up colds and simple fevers; correct diarrhoea and colic and promote healthy sleep by regulating the functions of the stomach and bowels. Concerning them Mrs. L. M. Edmondson, Walter, N. B., writes:—"I cannot speak to highly of Baby's Own Tablets as I have found them excellent for childhood ailments."

Baby's Own Tablets are sold by medicine dealers, by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Fatigue

Watch your little cold—beware of everyone who is coughing or sneezing—avoid crowded places, above all stop your grippiness cold at the beginning.

Doctors and nurses who have had long experience in handling grippiness advocate Catarrhose Vapor as an effective means of protection. It is very simple to use Catarrhose, and the whole family can enjoy its germ-killing protection at the cost of a few cents.

Put a teaspoonful of liquid Catarrhose in a pint of water. Boil this on a stove or lamp and bring the water to a boil. The vapor which rises contains the most powerful disinfectants. As you breathe this healing vapor, you kill the germs that cause colds, catarrh, flu, and grippiness. Splendid for children—equally good for the parents. Far better to protect the whole family in this way than to have a household of sickness. All druggists sell Catarrhose in 50c. bottles.

Revenue From Poultry
In 1913 revenue from the poultry industry in Alberta amounted to \$2,250,000. In 1927, 14 years later, revenue from this source was \$10,003,000, according to the poultry commissioner for Alberta.

In all infantile complaints that are the result of depredations of worms in the stomach and intestines Miller's Worm Powders will be found an effective remedy. They attack the cause of these troubles, and by expelling the worms from the organs insure an orderly working of the system, without which the child cannot maintain its strength or thrive. These powders mean health and improvement.

A New York sculptress excels in carving horses out of cheese. Her horses can be peeled into wench rabbits, later emerging as night-mares.

Scientists say the earth is cooling at the rate of two degrees every sixteen million years.

Inventor Of Many Electrical Devices

J. W. Legg, Who Died Recently, Was Wave Scientist

The death occurred in Wilkesburg, Pa., of Joseph Willard Legg, inventor and one of the foremost workers in the field of oscillography, or wave phenomena. He was 41 years old. A member of the meter engineering staff of the Westinghouse Electric and Manufacturing company, Mr. Legg developed many electrical devices, his greatest invention being the "oscilo," a small, portable, oscillograph extensively used in many branches of study. The instrument is now being used in St. Louis in experiment to help dead persons to speak by making visual records of their voice wave.

One has been taken by Commander Richard E. Byrd on his Antarctic expedition, where it will be used in the study of radio "dead spots" and the reflection of radio waves. Its other uses include measurement of nerve responses, measuring intelligence, for the study of musical overtones, for locating oil wells, measuring ship and train vibrations and, one of the most important phases, its use as an electronic cardiograph to make a complete permanent record of the action of the heart.

"Flu" Is Here In Dead Earnest

SICKNESS IN NEARLY EVERY HOME IN WESTERN CANADA

SUNDAY SCHOOL LESSON

FEBRUARY 3

THE HOLY SCRIPTURES

Golden Text: Open thou mine eyes, that I may behold wondrous things out of thy law. Psalm 119:18.

Lesson: Deuteronomy 6:4-9; John 1:8, 9; 2 Kings 22:20; Nehemiah 8:1-9; Psalm 119:17-14; Luke 24:25-32; Acts 17:10-12; 2 Timothy 3:14-17.

Devotional Reading: Psalm 119:105-112.

Explanations and Comments

The Value of the Scriptures, Psalm 119:11—The law of Jehovah, the testimony of Jehovah, the precepts of Jehovah, the commandments of Jehovah, the ordinances of Jehovah—all of these expressions are terms for the Scriptures of the Old Testament, especially for the Sacred Law which they contain. "The Christian Church has long and justly extended the words to the larger body of Scripture which forms the Bible." This, the Psalmist declares, is perfect, restoring the soul; sure, making wise; the simple; right, rejoicing the heart; pure. And jewels in the eyes. It is a parting refreshment and vigor to the soul, giving new life and hope; dying the senses; and the mind's eyes are heavy and dull, health brightens them; true, and righteous altogether.

The fear of Jehovah is clean, enduring for ever. "When among the five terms, each clearly significant of the Scriptures, the Psalmist introduces the abstract expression 'the fear of the Lord,' he must mean the awe, the obedience, the discipline and inspiration of the Book whose praise is the burden of his song" (George Adam Smith).

More to be desired are they than gold, yea, than much fine gold. "The Word like a deep, deep mine. And jewels in the eyes." Are hidden in its mighty depths. For every searcher there."

Tien with heart aglow, the Psalmist cries. "More to be desired are they than honey, and the droppings of the honeycomb"—the purest of the honey. "Moreover, when is the servant warmed in keeping them there is great reward."

If only we would obey the leading of the Spirit, as the planets of the sun, our lives would be full of light and health and liberty. We should be restored to perfect health; our simplicity would be made wise, our hearts would be gladdened; our eyes could be enlightened; our poverty enriched, and our dispositions sweetened" (F. B. Meyer).

Form Strange Society

Wives Of Gamblers In Budapest Have Organized Union

A strange society has just been formed in Budapest. The wives of gamblers have banded themselves into an anonymous union, with the object of preventing the tragedies resulting from losses at cards. The members of the union propose to visit members of parliament and enlighten them on the tragic family conditions brought about by the gambling clubs, and eventually to make an appeal to the minister of the interior.

The organizer of this union is the destitute widow of a gambler, who formerly himself in the Danube city committing forgery to pay his gambling debts.

During her husband's lifetime she formed the habit of waiting for him in the vestibule of the card club in the small hours of the morning, and there became intimate with numbers of women who waited, trembling, at the thought of the losses which their husbands would disclose to them when they came from the card rooms.

Speeding around corners is a straight road to the hospital.

MAMMOTH GRAIN ELEVATOR

The King government has undertaken to erect a huge grain elevator two and one-half miles from Prescott. This structure will cost \$4,000,000, the first contract to be awarded this month. The elevator will be able to unload upland vessels at the rate of 1,000,000 bushels daily and

Royal Bank Annual Meeting

The sixtieth annual meeting of shareholders of The Royal Bank of Canada, marked the close of the most successful year in the history of the bank. The report submitted showed that both the assets and the profits of the bank constituted a record for Canadian banking.

Dealing with the question of trade relations between Canada and the United States, Sir Herbert Holt, the president, said: "No country imports more goods from a single market than Canada imports from that country. The value of these imports during the twelve months ending September 30, 1928, aggregated 720 million dollars, a total more than 300 million dollars in excess of Canadian sales to that market during the same period. Such an unbalanced trade relationship is injurious to the national welfare of this country."

"It is a fact that the present trade relationship between the two countries is disproportionately favorable to the United States, there is active discussion of further increases that seem likely to shut out the few competitive items which Canada now sell there. It would seem that those who propose such tariff changes fail to realize that the Canadian prosperity automatically check the volume of goods which can be brought from the United States, and that on the other hand continued improvement in Canadian conditions brings corresponding increases in the volume of goods which they can sell us. From this viewpoint it might be considered economic statesmanship for the United States to discover means to increase their purchases from Canada, rather than to consider measures which will constitute new trade barriers."

General Manager's Address

Discussing the policy of developing the latest resources of our country, Mr. Neill said in part:—"During the past two, or three years many existing industries have been reorganized to meet the requirements of expanding markets. Mergers have been effected to ensure production on the most efficient basis and many new industries have been started. Through a number of different investment bankers who are our customers, we have had the opportunity to assist in such financing, with the result that numerous new and valuable companies have been secured for the bank. I am glad to be able to report that in every such case credit grants have been liquidated to our satisfaction, and, despite the number of new issues that have been made, we are carrying no undue securities."

He pointed out that in this period of prosperity reserves should be built up against less prosperous times. The public has the right to expect sound leadership in government and industry and with such leadership there can be no doubt concerning the wonderful prospects that the future holds in store for Canada.

Training For The Blind

Need For More Varied Occupation Says Major Timmins

Fifty per cent. of the blindness in the Dominion could be prevented if proper measures were taken by those liable to suffer injury to their eyes while at work or play declared Major A. N. Timmins, general manager of the Canadian National Institute of the Blind at a meeting of provincial field officials at the offices of the institute.

Major Timmins is touring the country to observe the work of the institute and in his short talk pointed out the need of an intelligent and intensive training for the blind. He stated that with such training the blind could work at almost any occupation besides the standard basketwork, reed work and broom making. In Saskatchewan alone, he said, some 150 blind persons would be able to earn their own living and not be a burden on society.

He said that over \$100,000 worth of goods made by the blind had been sold in this province in 1923 by the sales department through women's organizations. Of this sum the broom sales amounted to \$25,000. The total sales for the Dominion and Newfoundland totalled one million dollars.

Will Be Working Soon

Rural Credits Boards To Be Organized In Provinces

Now that the federal rural credits board has been completed, the task of organizing the provincial boards and of putting the Federal Rural Credits Act into operation will be proceeded with vigorously and it is regarded here as certain that the new loaning organization will be functioning before the spring break-up.

The most important job now is to get the provincial boards appointed. Six provinces are under the act, and, therefore, six separate boards are required. The system to be followed is that the provincial governments will submit a list of names of suitable men to the federal board and from this list the members will be chosen. It is understood that Hon. J. A. Robb, minister of finance, has written to the provinces urging early action. When all the boards are in existence, a proclamation will be issued bringing the new system into operation, and Mr. Robb will then give the federal board \$5,000,000 free of interest to be used in loans to farmers. This will be a sort of revolving fund since the mortgages taken in exchange for this money will be discounted and the money so obtained used to continue the business of loaning.

load St. Lawrence river boats at the same speed. In times of congestion railway cars can be loaded on four tracks at the same time.

which they can sell us. From this viewpoint it might be considered economic statesmanship for the United States to discover means to increase their purchases from Canada, rather than to consider measures which will constitute new trade barriers."

General Manager's Address

Discussing the policy of developing the latest resources of our country, Mr. Neill said in part:—"During the past two, or three years many existing industries have been reorganized to meet the requirements of expanding markets. Germany Buys Douglas Fir

Canadian Product Seems to Meet Requirements for Special Purposes

Douglas fir because of its superior quality in strength and strength, is the leading Canadian product to find a sale in the German market. It is increasingly substituting for pitch pine, because of the latter's gradual increase in price, while at the same time it has to compete against supplies from Washington and Oregon. It appears regularly to fill requirements for special purposes, being used for interior finishing, decking and deck boards, while plywood and logs are also imported when price is competitive.

Help For Asthma. Neglect gives asthma a great advantage. The trouble, once it has secured a foothold, fastens its grip on the bronchial passages tenaciously. Dr. J. D. Kellogg's Asthma Remedy is daily beneficial cases of asthma of long standing. Years of suffering, however, might have been prevented had the remedy been used when the trouble was in its first stages. Do not neglect asthma, but use this preparation at once.

Roofs Made Beautiful
A roof was once something to keep out the rain. Now with the growth of air travel it is becoming something to gaze upon with a sense of the beautiful, and architects are paying attention to this new development in their art. The proof of the roof is going to be in the viewing.

Some motorists drive as if they were insects to have their accident quickly and have it over with.

Are You Ready

Baby has more upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed, relieved, free from cramps, colic, or constipation, or diarrhoea, effective, too, for older children. Twelve-five million bottles were bought last year.

When your Children Cry for It

CHAPTER XIII.—Continued.

Connie raised her head. "Oh, no, I don't think so, Andy; that must slip on," she objected.

Andy made a pretence of studying the article in question.

"Yes, yes, sure! That's right! That's right!" he conceded quickly. Andy's pipe was now sending out billows of arid smoke. Connie moved on beyond the smoke screen. Much to Andy's relief, she sat for a moment silently studying the advertisement. When she raised her head there was a look of wistful yearning in her blue eyes.

"Oh, Andy," she said dreamily "it must be lovely to feel those soft silky things next your skin."

"I'm—I'm sorry, Connie," stammered Andy, "but I've a roast in the oven—"

"Just a minute Andy," she pleaded, "there is something else I want to ask you." She sorted the papers for a moment.

"God 'elp me, what will it be now?" thought Andy, as he braced himself for the next question.

"Andy, what is a camisole?"

A look of profound relief crossed the little Australian's face.

"A camisole," he explained with an air of wisdom, "is a fish. It's a—"

He was interrupted by Connie's peal of laughter. "Oh, Andy," she cried, "you're a funny man!" She turned and ran laughing down the hill.

"Strike me lucky!" exclaimed Andy as he mopped his brow. "It's enough to make a blighter's heart bleed. The poor motherless kid comes to a bloke like me to ask questions."

He watched Connie as she slowly ascended the trail, still studying the magazine pages.

"But 'ow the 'ell can I 'elp 'er?" He pondered deeply for a moment, but, seemingly unable to answer the question, shook his head sadly and turned to his duties.

Fortunately for Janet's peace of mind, none of her friends had recognized in the photograph of the new champion of Canada the handsome young man they had met at her home. They were puzzled by her decision to spend a holiday in the wilds until she casually mentioned that Mr. McLean was arranging for their entertainment, and she accepted with a smile the teasing that followed.

The party arrived by special train a day earlier than originally planned, and as Janet stepped to the platform Donald was for a moment disconcerted by the warmth of her greeting and the softness in her eyes as they rested on him.

That afternoon Connie came riding down the hill holding in her hand an enormous bouquet of Alpine flowers. She leaped from her horse and ran blithely around the corner of the big building. Andy, dressed in white coat and band, came smiling forward to meet her.

"Andy, here are some rare flowers Dad sent for—" She ceased speaking abruptly as Donald, leading Janet and her friends from a tour of the kitchen, came through the door.

Donald's face lighted with a glad smile as he saw Connie.

"Miss Ronald, I want you to meet Connie's face beamed with embarrassment as all eyes turned toward her, and the mass of wild flowers held crushed to her breast quivered as though shaken by a breeze. She glanced about her quickly, strongly tempted to flee the spot."

For a moment the society belle and the girl of the mountains eyed each other silently. Janet stared at Connie as if she were some strange creature unclassified by science.

Connie for the first time was gazing on a stylishly-clad member of her own sex. Janet's dress of white silk shimmered in the sunshine, and her broad-brimmed white hat, with lining of pale rose, gave to her beautiful face a ruddy glow.

Connie's eyes roved in admiring awe from the neat high-browed shoes to the silken hose and skirt, and then to the flowered hat set jauntily on thick shining coils of dark hair.

There was a certain dewy freshness about the girl's countenance, about the girl of the woods that made Janet appear artificial. Their eyes met, and Connie's lips parted in a timid smile revealing two rows of perfect milk-white teeth and forming two tiny dimples in her brown cheeks. Her lonely heart longed for the friendship of this wonderful girl, but the smile quickly faded when she saw that Janet's eyes remained cold and appraising.

Janet scrutinized Connie's flaxen curls, even though loose and tilted, could not conceal the graceful lines of the childish figure. Confused by the cold reception, her eyes wide and misty with a hint of pain, Connie turned quickly away.

Moving with the easy grace and freedom that an animal might enjoy, Connie walked to the side of her cayuse, and with characteristic birdlike motion sprang to his back. Her moccasined feet struck his sides, and with ears flattened Pegasus leaped forward with a speed that sent Connie's hair streaming. His spurring hoofs sent a cloud of dust in their faces, then horse and rider went tearing down the hill.

Janet stood staring after the flying rider, a look of blank astonishment on her face.

As the clatter of hoofs ceased, but from the highest point on the bluff she watched the merry-makers with keen interest, as, dressed in riding costumes, they rode their horses, disported themselves in bathing-suits on the rocky beach, played the lake in light, graceful canoes, or chugged about in the shiny white motor-boats. For two evenings she sat with a feeling of dreary loneliness while Donald and Janet floated on the placid lake in one of the tiny canoes, their subdued voices and gentle laughter coming up faintly from below.

During the evenings she spent with Donald, Janet was assailed by fleeting emotions in which she tried to define her attitude toward him. She felt that the time was not far distant when some definition would be necessary. In a number of artful ways she had tried, but without success, to lead him to talk of himself. When she put a direct question she saw the lines about his mouth tighten, and his reply carried a tone of distant uninterest rebuke that her face reddened and the subject was instantly dropped.

On the night before Janet's departure a dance was arranged, to which the clerical staff of the Cheakamus Mill was invited. The programme in the form of an old-fashioned square-dance with his "red-shirts" as the performers.

All that day the skies drizzled continuously; lake and mountain were hidden under a heavy mist. The inclement weather did not dampen the ardour of the merry crowd, who, in slickers and oilskins of every description, gathered flowers and trees to decorate the big dining room that was to be used as a dance-hall.

That night, lights gleamed from every window of the big room, which had undergone a sudden transformation. The walls were now massed with wild flowers, and on the beams overhead small cedars and jack-pines stood upright in rows, adding a pungent odour to the air, already burdened with the sweet smell of wild flowers. The music of the phonograph flowed out of the open door to vibrate softly through the dripping trees.

Connie learned of the dance, and after dark she slipped quietly down into the valley. She crouched by the open window, heedless of the rain dripping from the eaves, her eyes glued upon the enchanting scene within. She saw Donald and Janet gliding across the floor, and she marvelled at the grace of their movements. The hum of talk, the constant ripple of feminine laughter, the rustle of silken skirts, were all foreign to Connie. She felt a touch of intense and utter loneliness, like a stranger in a strange land.

Janet seemed to have thrown aside her cloak of reserve; the brimmed over with an unwonted gaiety, but at times her big brown eyes held a troubled look as they rested on Donald.

Gillis's "redshirts" ailed in to give an exhibition of fashionable dancing. Half the men were handkerchiefs tied about their arms to indicate that they were impersonating ladies. Blackie played the violin, while "Fighlin' Jack's" roaring voice did the "callin' off."

"Didn't know a note of music from a post-hole." But what he lacked in technical knowledge was made up in the immense volume of sound he produced from the instrument, and the speed he set for the music.

Donald to follow soon had them dripping with perspiration. There were shouts of Homeric laughter. Big feet thumped the floor as they gyrated through the intricate steps of the quadrille, and above all sounded the hoarse voice of "Fighlin' Jack" in the colorful jargon of "callin' off."

"Birdie jump out and Jackie jump in!"

Jackie jump out and give Birdie a swing.

All the men left; back to partner. And grand right and left.

As the clatter of hoofs ceased, but from the highest point on the bluff she watched the merry-makers with keen interest, as, dressed in riding costumes, they rode their horses, disported themselves in bathing-suits on the rocky beach, played the lake in light, graceful canoes, or chugged about in the shiny white motor-boats. For two evenings she sat with a feeling of dreary loneliness while Donald and Janet floated on the placid lake in one of the tiny canoes, their subdued voices and gentle laughter coming up faintly from below.

During the evenings she spent with Donald, Janet was assailed by fleeting emotions in which she tried to define her attitude toward him. She felt that the time was not far distant when some definition would be necessary. In a number of artful ways she had tried, but without success, to lead him to talk of himself. When she put a direct question she saw the lines about his mouth tighten, and his reply carried a tone of distant uninterest rebuke that her face reddened and the subject was instantly dropped.

On the night before Janet's departure a dance was arranged, to which the clerical staff of the Cheakamus Mill was invited. The programme in the form of an old-fashioned square-dance with his "red-shirts" as the performers.

All that day the skies drizzled continuously; lake and mountain were hidden under a heavy mist. The inclement weather did not dampen the ardour of the merry crowd, who, in slickers and oilskins of every description, gathered flowers and trees to decorate the big dining room that was to be used as a dance-hall.

That night, lights gleamed from every window of the big room, which had undergone a sudden transformation. The walls were now massed with wild flowers, and on the beams overhead small cedars and jack-pines stood upright in rows, adding a pungent odour to the air, already burdened with the sweet smell of wild flowers. The music of the phonograph flowed out of the open door to vibrate softly through the dripping trees.

Connie learned of the dance, and after dark she slipped quietly down into the valley. She crouched by the open window, heedless of the rain dripping from the eaves, her eyes glued upon the enchanting scene within. She saw Donald and Janet gliding across the floor, and she marvelled at the grace of their movements. The hum of talk, the constant ripple of feminine laughter, the rustle of silken skirts, were all foreign to Connie. She felt a touch of intense and utter loneliness, like a stranger in a strange land.

Janet seemed to have thrown aside her cloak of reserve; the brimmed over with an unwonted gaiety, but at times her big brown eyes held a troubled look as they rested on Donald.

Gillis's "redshirts" ailed in to give an exhibition of fashionable dancing. Half the men were handkerchiefs tied about their arms to indicate that they were impersonating ladies. Blackie played the violin, while "Fighlin' Jack's" roaring voice did the "callin' off."

Great Britain Saving Moving Picture Films

Plans To Keep Record Of Important Events In National Life

Plans for the preservation for posterity of motion picture films of successive, but authentic, events of British history are being laid by the British Empire Film Institute.

This particular work is under the trusteeship of Lord Ashville, Rear Admiral R. E. Evans and Alfred C. Bosom, architect.

The first exhibit obtained by the Institute is the original film of Captain Scott's ill-fated expedition to the South Pole, which Evans assumed command after Scott's death.

Other films which the Institute hopes to acquire will show representative features of British life, such as Armistice day ceremonies, the Lord Mayor's parade, pictures of the motor traffic in congested streets and activities of the royal family.

Says Food Controls Height

Stature of Races Depends On Nutrition, Says Professor of Anatomy

According to Dr. R. Bennett Bean, a professor of anatomy, who has analyzed the measurements of 1022 groups of people of five continents, nutrition fixes the stature of races. People living near the sea grow too much inland and tend to short stature; inland people get thin.

It is not for long bones. The lack of nourishment in the equatorial and arctic zones keeps those people short. People who live in the fertile temperate zones have more and better food and therefore grow taller.

The average height of human beings is five feet five inches. The tallest group are the Australians, six feet one inch, and the shortest the African Negrillos, four feet three inches, and the Eskimos.

Deen Or None

Mr. Nuritch has suddenly come into a large sum of money. One day he was passing a furniture shop when four old chairs caught and held his attention. Nuritch entered the shop and asked the price of the chairs. On receiving a favorable quotation he asked for a dozen to be sent to his home.

"But we've only got four," said the assistant. "They are antiques, you see, sir."

Nuritch was not used to this sort of treatment.

"All right!" he snapped. "Cancel the order!"

TISSUE TONE

Just what does the term imply? Well, doubtless at some time or other, you have had your doctor advise "that the system needs a general toning up." This should afford a clue as to its meaning.

Under conditions of normal life, as the tissues grow and perform their functions, worn-out cells die.

As bones grow, it is absorbed little by little to make room for the remodeling and growth of the larger structure. Also, bacteria, ever present in the oral cavity, gain access beneath the protective covering of the mouth tissues.

However, nature has made provision for the disposal of these worn-out fragments and foreign intruders, by the activities of certain lowly organized cells known as phagocytes.

In health, these little warriors are able to perform their functions of waste disposal and, as well, the more militant duties of combating and destroying the invading organisms.

But with a lowered resistance of the body cells, through local or general disturbances, the defence is weakened, permitting in the case of a poisonous duty of combating and destroying the invading organisms.

With a lowered resistance of the body cells, through local or general disturbances, the defence is weakened, permitting in the case of a poisonous duty of combating and destroying the invading organisms.

Keep a Box Always Handy!

Zam-Buk provides an ever-ready and reliable first-aid for injuries. It is also unequalled as a soothing, speedy remedy for obstinate and deep-seated skin disease, poisoned wounds, ulcers, piles, etc.

Within every box of Zam-Buk are stored the most valuable healing, soothing and antiseptic properties known to Science. Its unique herbal composition and its absolute freedom from animal fats and mineral drugs make Zam-Buk the safest and best dressing for skin troubles of all kinds.

Get a 30c tin of this great healing ointment today, or ask Zam-Buk Co., Toronto, for a FREE TRIAL SAMPLE.

Nothing Like Zam-Buk FOR THE SKIN

Little Helps For This Week

Now are we sure that Thon knows all things.—John xvi. 30.

Only God knows the trials that we bear.

The weary longing for a different fate.

The daily struggle and the anxious care.—

He knows, and we can wait.

Only God knows—we have no want.

Our Father watches o'er us from above.

We feel our weakness, but His hand will guide.

He knows, and He is Love!

—Mary Dickinson.

Trust him implicitly, submit to him cheerfully, and you will find that all shall be well; that more grace will be given you; that the heavier the trial the larger will be the blessed measure of the strength.

The Shepherd is leading you in the right way to His own blessed fold. Leave it all to Him.

—Alexander McKenzie.

Minard's Liniment prevents Flu.

Classical Music

"Can you distinguish classical music?" asked Mrs. Newrich. "I think so," replied her husband. "When a piece threatens every minute to be a tune and always disappoints you, it's classical."

A good rule for autists is to drive as if their own family were in the other car.

"Thrilling Moments," the picture to be shown at the Palace on Wednesday only, Feb. 6, will include two rounds each of boxing matches in which the following well-known prize fighters have taken part: Jack Sharkey, Tommy Loughran, Leo Lomski, Paulino Uzcudun, Jack Delaney, Tom Heeney. Stirring events in ring history brought as close to you as a ringside seat.

Main Line Trains Routed via Crow

Owing to the collapse of a bridge at Revelstoke, causing the death of two railroad men well known in that district, main line trains are being diverted from Calgary through Macleod and over the Crow's Nest division, joining up with the main line at Hope, B. C.

SUPPORT COLEMAN ORCHESTRA

A number of musicians under the leadership of James Fulton have organized under the name of the "Full-Tone" orchestra, and are open for engagements for dances, socials and other events where music is required. Mr. Fulton was an ardent worker for the band during the summer, and as leader rapidly brought the band to the attention of the public by its concerts. The members of the orchestra are reliable and experienced, and furnish a program of the latest dance music.
